

## TOTAL TRANSFER POINT SPILLAGE CONTROL

- Brelko design and manufacture conveyor belt cleaning equipment for a trouble-free flow of materials at transfer and load points. This is backed up by an installation and maintenance package including a 24 hour call out service.
- We have over 25 years experience as a supplier and advisor on spillage control to the bulk materials handling industry and offer proactive and ongoing maintenance for preventative spillage control and optimum belt cleaning.
- We are accredited with ISO 9001:2008 and OHSAS 18001:2007 certification and are members of the Institute of Materials Handling and Conveyor Manufacturers Association.
- We supply and service our products throughout the world, with branches in the United Kingdom and the United States, our master distributors in Australia and Greece, and agents located in Africa and more than 30 countries.

### Belt Tracking Systems

Brelko Belt Tracking Systems can be installed on the troughing and return side of the belt to centralise a misaligned belt, prevent spillage, decrease downtime, decrease maintenance and extend belt life.
